

Partnership is our key resource in protecting our national security interests

As Americans, our lifestyle, economy, and national security are supported by a complex framework of businesses and services. The central role of these critical infrastructures and key resources (CIKR), makes them especially vulnerable as targets for both physical and cyber attacks.

The mission of the FBI is to protect the American people and uphold the U.S. Constitution. Our vision is to remain ahead of the threat through leadership, agility and integration. In an era where threats to our country and risks to private enterprise are escalating and intersecting, building mutual respect and cooperation between the FBI and the private sector has never been more important.

The majority of infrastructure in the U.S. is owned and operated by the private sector; therefore, cultivating partnerships and incorporating key industry stakeholders is crucial to support the government in protecting critical infrastructure.

InfraGard provides a vehicle for seamless public-private collaboration; expedites the timely exchange of information; and promotes mutual learning opportunities relevant to CIKR defense.

The InfraGard Members Alliance (IMA) leverages the expertise of a wide range of private sector partners who own, operate, and hold key positions within approximately 85 percent of the nation's critical infrastructure.

With thousands of vetted members nationally, InfraGard's subject matter experts include business executives, entrepreneurs, lawyers, military and government officials, IT professionals, security personnel, academia, and state and local law enforcement—each dedicated to contributing industry-specific insight and advancing national security. Through this partnership, both the FBI and private sector gain an improved understanding of the threatscape and share valuable intelligence.

Member Benefits

Access to InfraGard's Secure Web Portal:
www.infragard.org

- FBI accredited website with secure messaging that promotes communication among members
- FBI and DHS threat advisories, intelligence bulletins, analytical reports, and vulnerability assessments in real time
- Access to iGuardian, the FBI's cyber incident reporting tool designed specifically for the private sector

Unique Networking Opportunities

- FBI and other government agency presentations to InfraGard Member Alliance events
- Special Interest Groups (SIGs)
- Peer-to-peer collaboration across InfraGard's broad membership
- Information sharing and relationship building with FBI and law enforcement at all levels

Training and Education

- Information Sharing Initiative (ISI) training program
- FBI and other government security awareness training programs
- Local and online training and event discounts
- Free or discounted local seminars and conferences

MEMBERSHIP REQUIREMENTS:

- U.S. citizen, 18 years or older
- Affiliated with a critical infrastructure sector
- Consent and pass FBI security risk assessment and periodic re-certifications
- Notify the FBI of any pending criminal matters
- Sign and adhere to a confidentiality and non-disclosure agreement
- Agree to adhere to InfraGard Code of Ethics and Information Sharing Policies

AN ALLIANCE
FOR NATIONAL
INFRASTRUCTURE
PROTECTION

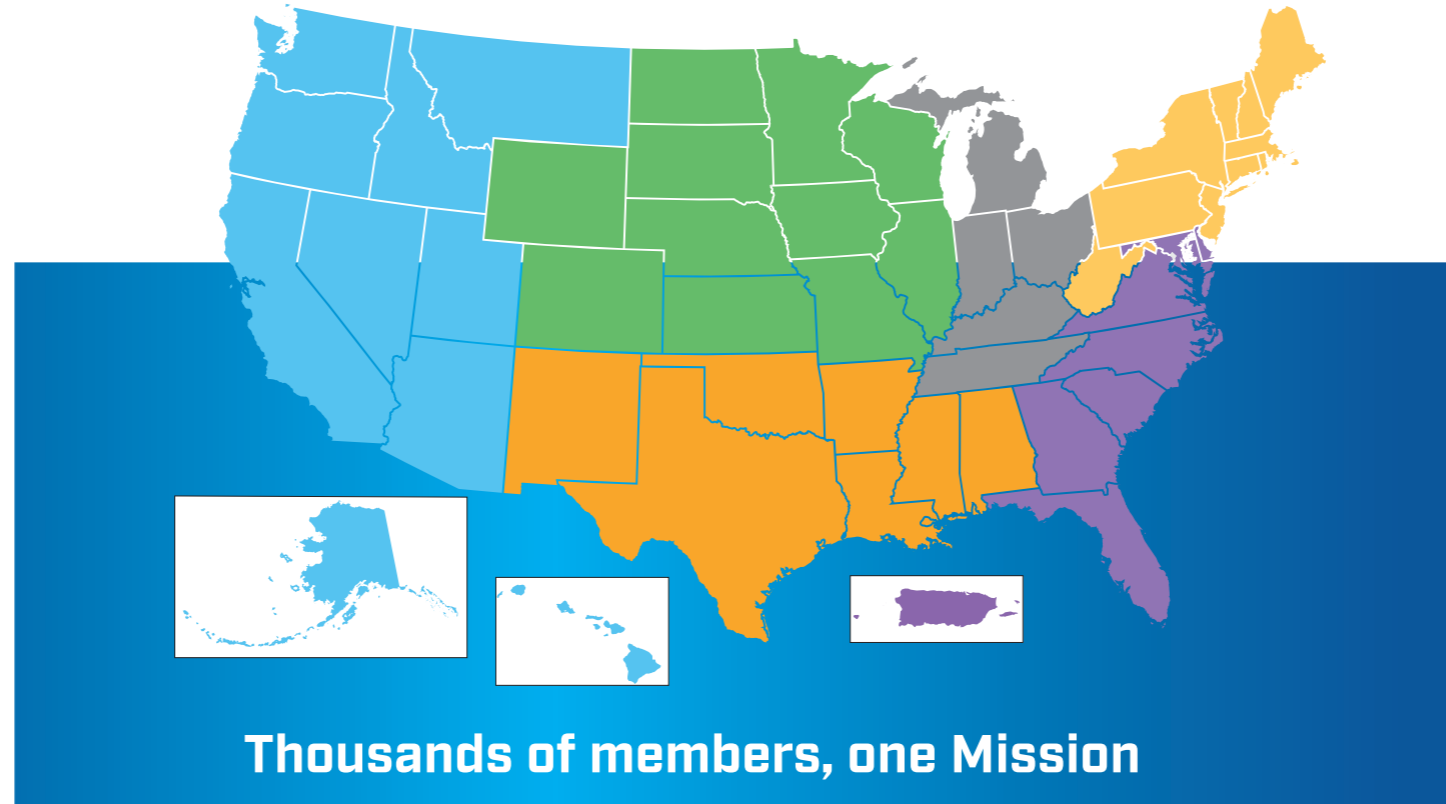

Defending our nation's most critical assets

InfraGard engages subject matter experts and addresses threat issues across each of the 16 critical infrastructure sectors recognized by Presidential Policy Directive-21 (PPD), the Department of Homeland Security (DHS), and the National Infrastructure Protection Plan (NIPP).

Critical infrastructures are those systems and assets, whether physical or virtual, so vital to the United States that their incapacity or destruction would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters, as defined in Section 1016(e) of the USA PATRIOT Act of 2001, 42 U.S.C. § 5195c(e).

Key resources are publicly or privately controlled resources essential to the minimal operations of the economy and government. The destruction of these individual targets would not only endanger security on a national scale, but would also create local disaster or profoundly damage national morale, as defined in Section 2(9) of the Homeland Security Act of 2002, 6 U.S.C. § 101(9).
